Subject: Vector PDFs for El Charro Infrastructure

Mr. Costas,

Please authorize Farnam Engineering to release standard vector PDF files of the El Charro project plans, to supplement the raster image versions currently available.

Carter Construction relies upon modern computer-aided takeoff and simulation methods to provide timely, competitive earthwork bids and reliable, on-schedule grading performance. In addition to your paper plans, providing us the grading plan PDFs in standard, compact, high-res, computer-vectorizable form will enable us to do our best work for the City of Livermore.

Mr. Costas, thank you for your prompt attention to this critical matter. Please ask Farnam to advise us when the vector Pdf files will be available.

Best regards,

Robert J. Carter
