

Need AGTEK training fast?  
Need a quick refresher?

AGTEK Web Training Classes offer live, personalized, hands-on training, one-on-one with an AGTEK expert, over the Internet, in your own office.

To get up to speed in a single morning or afternoon with streamlined interactive instruction on your preferred schedule, register today.

### Earthwork 3D Basics - \$500

This basic dirt takeoff class covers PDF entry of original ground and proposed subgrade from plan sheets, with an introduction to CAD files. Topics include data entry, editing, CAD import, quantity analysis, and the formatting of reports using Earthwork 3D.

### Materials 3D - \$500

This materials takeoff class covers PDF entry from plan sheets and takeoff entry from CAD files, with instruction on using Structures and Materials databases, as well as editing, reviewing, and formatting reports using Materials 3D.

### Highway 3D Training - \$500

This highway dirt takeoff class covers PDF entry from platted cross sections as well as electronic cross section import from DOT files. Other topics include haul analysis using a mass diagram, coordinate geometry (cogo) entry of profile grade lines, review, editing and formatting of reports. Course requires prior experience using Earthwork 3D.

### Earthwork 3D Site Modeling - \$500

This 3D site modeling class covers the processing of takeoffs and CAD files into precise GPS grading models. Topics include matching takeoffs to CAD coordinates, entry of benchmark control points, refining and inspecting the 3D model and exporting it to GPS field software. Requires an Earthwork 3D takeoff, CAD file and control points from one of your actual jobs.

Prerequisites: Participants must have prior plan-reading experience, basic computer skills and high-speed Internet access.
